StarBridge

A leading Laboratory for transportation system in China use the StarBridge **Serial RapidIO Bridge board SREB01, Switchbox SRES01** and **Fabric Management Library software** for the High Speed Train system.   StarBridge, Inc is located in Tokyo.

Tokyo, Japan Jan 5, 2023--StarBridge, Inc, a leader in trusted, Switched Fabric Technology for the industry, communications and military defense projects, today announced that its high-performance switched fabric solution was selected by **a Chinese customer**, the details of which are highly confidential.   The **SREB01** PCIe to SRIO bridge product support Gen2 **PCIe** and **Serial RapidIO** and **Fabric Management Library**.   It is a high-performance switched fabric enable with low latency, peer to peer, high speed connection up to 5Gbaud between computer nodes and I/O node, and **SRES01 Gen2 SRIO** switchbox product supports 8 port **Serial RapidIO** which it is a high-performance switched fabric enable with low latency, peer to peer, high speed connection up to 25Gbps x 8 port between computer nodes and I/O nodes. "Our customer depends on StarBridge to help them solve their most reliable-critical challenges," said Akira Sato President and CEO of StarBridge. "In delivering a SRIO switched fabric communications that is a reliable for the date synchronization and high speed data transfer availability, we are proud to play a role in supporting our customer's desire to ensure **high speed train system** solution."

"Since 2019, StarBridge has been a supplier to leading Laboratory in China and we continue to deliver best-of-breed technologies and rapid deployment services that improve nearly every aspect of the system."

About Shanghai Yongsha Electronics:
Long term distributor of StarBridge for Chinese customers, to deploy integrated hardware and software in a variety of test systems and development programs.

"We have successfully brought StarBridge's Serial RapidIO products into China market, including Telecommunication, Automation and Public transportation industries. Because of its good data synchronization and high speed availability which is much better than the traditional Ethernet system, our customers are very satisfied with StaBridge products. We also really appreciate we can get continuous technical support from StarBridge.   I firmly believe that our mutual cooperation will be further strengthened in the future", said Zhou Feng, the President and CEO of Shanghai Yongsha Electronics.

About StarBridge:
StarBridge Inc, in trusted, the leading integrator in Switch Fabric Technology in Japan.
StarBridge has been integrating Serial RapidIO and PCI Express technologies for worldwide customers for over 20 years in applications such as; semiconductor manufacturing equipment, medical imaging, industrial control, military and aerospace, communications, and server expansion. StarBridge has provided the RapidExpress products which is a de-facto standard for SRIO products, design service and system integration, including custom hardware and software design, for the customers worldwide. StarBridge also provides DSP and high-speed digitizing systems as the high grade system integration. To learn more, and for more information, visit http://www.starbridge.co.jp
