

A major industrial enterprise in China has selected the StarBridge **Serial RapidIO Switch products SRES10XN** and **Fabric Management Library software** as part of its intelligent automation infrastructure. StarBridge, Inc is located in Tokyo.

Tokyo, Japan July 22, 2025--StarBridge, Inc, a leader in trusted, Switched Fabric Technology for the industry, communications and military defense projects, today announced that its high-performance switched fabric solution was selected by a Chinese customer, the details of which are highly confidential. The **SRES10XN** SRIO switching product support Gen3 **Serial RapidIO** and gives a new solution designed to enhance the performance with **Fabric Management Library**. It is a high-performance switched fabric enable with low latency, peer to peer, high speed connection up to 50Gbaud between computer nodes and I/O node, and 600Gbps 100ns low latency full duplex switchbox supports 12 ports **Serial RapidIO** products.

"Our customer depends on StarBridge to help them solve their most reliable-critical challenges," said Akira Sato President and CEO of StarBridge. "In delivering a SRIO switched fabric communications that is a reliable for the data synchronization and high speed data transfer availability, we are proud to play a role in supporting our customer's desire to modernize its production lines with high-reliability, low-latency data communication technologies that enable real-time control and monitoring across complex industrial environments. By drawing on capabilities from across our enterprise to build an integrated yet configurable, high-performance solution, we are accelerating technology insertion and supporting our customer's mission with trusted, leading-edge technology"

"Since 2019, StarBridge has been a supplier to leading manufacturer in China and we continue to deliver best-of-breed technologies and rapid deployment services that improve nearly every aspect of the system."

About Shanghai Yongsha Electronics:

Long term distributor of StarBridge for Chinese customers, to deploy integrated hardware and software in a variety of test systems and development programs.

"We have successfully brought StarBridge's Serial RapidIO products into China market, including Telecommunication, Automation and Public transportation industries. Because of its good data synchronization and high speed availability which is much better than the traditional Ethernet system, our customers are very satisfied with StarBridge products. We also really appreciate we can get continuous technical support from StarBridge. I firmly believe that our mutual cooperation will be further strengthened in the future", said Zhou Feng, the President and CEO of Shanghai Yongsha Electronics.

About StarBridge:

StarBridge Inc, in trusted, the leading integrator in Switch Fabric Technology in Japan.

StarBridge has been integrating Serial RapidIO and PCI Express technologies for worldwide customers for over 20 years in applications such as; semiconductor manufacturing equipment, medical imaging, industrial control, military and aerospace, communications, and server expansion. StarBridge has provided the RapidExpress products which is a de-facto standard for SRIO products, design service and system integration, including custom hardware and software design, for the customers worldwide. StarBridge also provides DSP and high-speed digitizing systems as the high grade system integration. To learn more, and for more information, visit <http://www.starbridge.co.jp>
