

A leading global manufacturer of Power Energy in the Europe use the StarBridge **Serial RapidIO Switchbox SRES01** and **Fabric Management Library software** for power transmission line of the system. StarBridge, Inc is located in Tokyo.

Tokyo, Japan Aug 26, 2022--StarBridge, Inc, a leader in trusted, Switched Fabric Technology for the industry, communications and military defense projects, today announced that its high-performance switched fabric solution was selected by **a European customer**, the details of which are highly confidential. The **SRES01 Gen2 SRIO** switchbox product supports 8 port **Serial RapidIO** which it is a high-performance switched fabric enable with low latency, peer to peer, high speed connection up to 25Gbps x 8 port between computer nodes and I/O nodes. See below.

“Since 2019, StarBridge has been a supplier to leading manufacturer in Europe and we continue to deliver best-of-breed technologies and rapid deployment services that improve nearly every aspect of the system,” said Akira Sato President and Chief Executive Officer.

About StarBridge:

StarBridge Inc, in trusted, the leading integrator in Switch Fabric Technology in Japan. StarBridge has been integrating Serial RapidIO and PCI Express technologies for worldwide customers for over 20 years in applications such as; semiconductor manufacturing equipment, medical imaging, industrial control, military and aerospace, communications, and server expansion. StarBridge has provided the RapidExpress products which is a de-facto standard for SRIO products, design service and system integration, including custom hardware and software design, for the customers worldwide. StarBridge also provides DSP and high-speed digitizing systems as the high grade system integration. To learn more, and for more information, visit <http://www.starbridge.co.jp>
